# POOJA MISHRA

## SOFTWARE DEVELOPER

## CONTACT

- +91-9691362752
- poojamishra1309@gmail.com
- My Portfolio
- LinkedIn
- Bhopal, MP

## SKILLS

- **Frontend Development:** React.js, Redux Toolkit, Async-Thunk, JavaScript, DOM Manipulation, HTML, CSS
- **UI/UX Design:** Material-UI, Responsive Design
- **Form Handling:** Formik, Yup Validation
- **State Management:** Redux Toolkit
- **Other Tools:** Version Control (Git), API Integration

## EDUCATION

**2016 - 2020**

**RGPV University, India**

Bachelor of Engineering (B.E)

8.56 CGPA

## HOBBIES

- Video Editing
- Badminton
- Mandala Artwork

## WORK EXPERIENCE

**July 2024 - Present**

**Metasquare Technologies Pvt. Ltd.**

**Project** : Practice Management Software

**Role** : Frontend Developer

- Developed the practice management software, ensuring a seamless and user-friendly interface.
- Implemented state management using Redux Toolkit for efficient and scalable application state handling, and utilized Redux Thunk for asynchronous operations.
- Designed dynamic and responsive forms using Formik for form management and Yup for client-side validation.
- Enhanced UI/UX with Material-UI (MUI) components, ensuring a professional and consistent design.
- Worked collaboratively with backend developers to integrate APIs and ensure smooth data flow across components
- Debugged and optimized the application for better performance and cross-browser compatibility.

**Sept 2021 - June 2023**

**Software Engineer - Infosys**

Worked on developing, implementing, and optimizing software solutions tailored to client needs.

- Implemented Dynamic Fields feature (complete frontend and backend) which allows admin user dynamically determine mandatory/nonmandatory and visible/invisible form fields in the application
- Implemented UI for different Admin Screens, Worked on implementing foundational features of React.js, focusing on building reusable components and improving UI/UX design.
- Collaborated with cross-functional teams to design, test, and deploy user-facing features.
- Provided technical support and debugging for web applications to ensure smooth performance and client satisfaction.
- Implemented screenshot feature with drag and crop for a chrome extension using HTML Canvas
- Implemented Instagram, and Twitter post-capturing feature (Screenshot of Post and Embedded Link) for a chrome extension

## PERSONAL PROJECTS

**Food Ordering App**   Project Link   Source Code

- Built a food ordering app using the **MERN** stack, incorporating **Vite, React,** and **TypeScript** for a fast and type-safe front end, with enhanced UI components provided by the **Shadcn library**.

**Employee Management System**   Source Code

- Developed an Employee Management System using React.js and Redux Toolkit, featuring CRUD operations for efficient state management and dynamic user interaction.
- **Key Skills:** React.js, Redux Toolkit, JavaScript, State Management, CRUD Operations.
